

## **PERSONAL PROJECTS**

<http://monopoly-calc.com>

[React, Bootstrap, CSS]

<http://hymnsbg.info>

[VueJS, Tachyons CSS, JSON, Netlify]

<https://yolkfolks.com>

[VueJS, Vuex, Tachyons CSS, Firebase, Netlify]

<http://pnwlabelr.surge.sh>

[React, AmpersandJS, JSX, NodeJS] - this was a tutorial from Henrik Joreteg

## **PROFESSIONAL EXPERIENCE**

**REI (Spectraforce Technologies)** Kent, Washington

September 2019 - Current *Front End Software Engineer*

Onsite contractor at REI headquarters. Part of the platform front end team that provided Thymeleaf Java based global templating, built on a microsite architecture. Helped maintain and update Spring MVC libraries which other REI front end engineers used to convert the monolith to a new microsite. Joined late focus on web performance improvements. Our repositories were on private Bitbucket, using a Gitflow process. Collaboration tools included JIRA, Slack, MS Teams and Zoom.

**Honor Tag**

Remote

August 2019 - March 2020

*Front End Web Developer*

One of two developers to begin building, from the ground up, a web app for military veterans to submit their military information to tell their story of their military experience. Worked with a small remote/distributed team consisting of one designer, agile coach and social media manager. We leveraged VueJS, Vuex, Tachyons CSS, Firebase auth/Firestore/Functions as our stack, with Stripe SDK as our payment platform. Tasks were managed in Trello. Workflow was using Gitflow with Github as our online repository and Netlify to deploy. Zoom was used for all meetings.

**Halo Platform**

Remote

August 2018 - April 2019

*Front End Web Developer*

Co-designed and developed the front end of a [player's hub web app](#), as well as a cryptocurrency wallet system, for a blockchain based gaming ecosystem. Leveraged VueJS, Vuex and Tachyons CSS along with consuming the Gamesparks SDK and various API's for player auth, game data and account administration. Participated in UI design reviews, sprint reviews, and retrospectives. Managed sprint tasks and goals in Waffle/Github. Maintained/revamped existing corporate websites with the Jekyll development framework. Zoom was used for all meetings.

**Fluke Corporation (Modis)**

Everett, Washington

November 2017 - May 2018

*Front End Web Developer*

Dedicated front end web developer on contract, building HTML/CSS/JS landing pages and emails for product launches, including maintaining 60+ global product websites in 30+ languages through various content management systems in a fast paced environment with tight deadlines. Systems used: JIRA, Eloqua, MS CMS, Clickability, Drupal and CRM.

**Ström Coffee**

Richland, Washington

September 2013 - October 2015 *Owner/Operator*

Acquire, design and build out a 1964 Airstream into a mobile walk-in coffee shop, manage the business operations of a retail coffee shop including purchasing, accounting, inventory planning, cash handling, enthusiastic hospitality, customer education and marketing.

**Umatilla Electric**

Hermiston, Oregon

February 2005 – August 2013

*IT Analyst II*

Administration/support of Windows based desktops, servers (including virtual), Active Directory, iOS/Android devices, VOIP system (Avaya), Building Security systems (Kantech), Asset Inventory system (Footprints), LAN hardware (Juniper), Video Surveillance (Milestone/IQInvision), various industry related applications (Clevest, TWACS, Itron), server room redesign including redundant power distribution, rack space design, cable/patch panel management.

## **EDUCATION**

[Udacity Online Web Development Training \(2015-17\)](#) and [Coursera Online Web Development Training \(2016\)](#)

React Nanodegree Course, HTML/CSS/JS, Front-End Web-UI Frameworks, Server-Side Development with Node

[Human Javascripting Video Series \(2016\)](#)

Online video series building out a static front end application using React, taught by [@henrikjoretag](#).
